moibetancourt-dev.vercel.app/en

I am a software developer with a comprehensive understanding of the development process, capable of transforming ideas into functional solutions that align with the client's objectives. I have recently completed the coursework for my Bachelor's degree in Software Development at the Technological University of Panama and am currently studying for Oracle's Java SE Programmer certification in preparation for my final project.

During my time at a software development startup, I have actively participated in collaborative projects, presenting progress to clients, proposing improvements, and taking on key responsibilities at various stages of development.

PROFESSIONAL EXPERIENCE

Kuarco - Software Development Startup

Full Stack Developer

July 2025 – Present

- Web application development with Next.js, Supabase, and FastAPI.
- Project deployment and management using Docker and EasyPanel.
- Integration of CMS and payment gateways.
- Creation of administrative dashboards and dynamic systems for clients.
- Implementation and maintenance of AI agents on WhatsApp using n8n, Langchain, LangGraph, and the Evolution API.
- Integration of Chatwoot, ZeptoMail, Google Search Console, and CAPTCHA.
- Presentation of prototypes and progress to clients, ticket resolution, and autonomous development of projects from start to finish.

EDUCATION

Panama University of

Technology — Bachelor's Degree in Software Development (4th year completed)

Samsung Innovation Campus —

AI with Python (Jan–Jul 2024)

EVENTS

Hackathon Copa Linux 2024 –

Copa Airlines

Entrepreneurship Challenge 2024

– Rootstack (E-commerce with React.js)

SKILLS

- Full stack web development with HTML, CSS, JavaScript, React, Next.js, and Tailwind CSS.
- API and backend integration using FastAPI (Python) and Java (Spring Boot).
- Database management with SQL, Supabase, MySQL, and PostgreSQL.
- Project deployment and containerization with Docker and EasyPanel.
- Automation and integrations using n8n, Chatwoot, Strapi, NMI, and ZeptoMail.
- Version control and collaboration with Git and GitHub.
- Design and analysis of software architectures, and ability to present prototypes and progress to clients.
- Implementation and maintenance of AI agents using LangChain and LangGraph.
